 - iii. Beginning Fall 2014, the electronic process also will allow students to view the status of their application online. There will be a 'queued', 'Approved', and 'Denied' status with additional explanation accompanying the 'queued' status.
 - iv. For those familiar with the paper process, there will be a few changes when moving to the electronic process. The biggest change will be no submitting paper copies of abstract acceptance / registration confirmation. Instead

Applications will be accepted from December 15, 2014. Any applications received before this date will not be considered for funding.
 - ix. The PAG committee members worked incredibly hard this summer. There was much progress made towards reworking the PAG system this past spring and these wonderful women and men on the PAG committee, really took it to the finish line this summer. They looked at the current system and where the system was going with the incremental bills passed so far and then used historical and survey data to make informed amendments to the policies and procedures. Lastly Senator feedback was solicited and all feedback received was addressed, which lead to additional positive changes in our final bill up for a vote tonight.

Random Integer Set Generator

This form allows you to generate random sets of integers. The randomness comes from atmospheric noise, which for many purposes is better than the pseudo-random number algorithms typically used in computer programs.

Step 1: The Sets

Generate set(s) with unique random integer(s) in each.

Number of available PAGs goes here

Each integer should have a value between and (both inclusive; limits $\pm 1,000,000,000$).

The total number of integers must be no greater than 10,000.

Number of applications goes here

Step 2: Display Options

Each set will be printed on a separate line. You can choose from the following extra options:

- Number the sets sequentially
- Use commas to separate the set members
- Sort the members of each set in ascending order

You can select the order in which the sets are printed:

- Print the sets in the order they were generated
- Order the sets by the values that occur in them (in this case, you should also consider sorting the members of each set)
- Print the sets in random order

Step 3: Go!

Be patient! It may take a little while to generate your sets...
