**1 - Current (and best) suggestion so far has been to never add additional funds to PAGs that were not previously budgeted

IOWA STATE UNIVERSITY

Graduate & Professional Student Senate

**2 - These changes are NOT due to the change from the old First-Come-First-Served system to the new Random Lottery system. This difference IS a consequence of 1) A change from using “travel” dates to using “application” dates during the PAG awarding process, and 2) A decision to not allow reapplications (or simply rollover eligible applications) when denied due lack of funding in a given month (e.g. not selected in a lottery)

**3 - When they are awarded a PAG, Students do NOT receive funds upfront. Students are reimbursed through a process within their departments after travel has occurred.

- ii. Following the presentation, Senate feedback was requested:
- iii. Senate feedback for
 - 1. Keeping the PAG amount at \$200: 38%
 - 2. Decreasing the amount to serve more students: 64%

 - 2. Application Date: 13
 - 3. Abstain: 11

- ii. Report of the Vice President and Rules Committee – Vice President Zachary Zenko

1. Suggestions for supplementary materials to be sent with legislation

- a. After an inspiring chat with Provost Wickert, I would like to suggest that legislation – especially complicated legislation – includes an attachment that explains the implications. A recent example is the legislation brought before the Senate with tracked changes. This supplement material, though not required, could make the argument prior in favor of the bill prior to the Senate meeting. This will give the Senate more time to read it, think about it, and come up with reasoned discussion points.
- b. This would also give the Senate ample time for fact checking, outside of the Senate floor.
- c. Importantly, it should be noted that any legislation coming before the Senate floor is not necessarily endorsed by the executive council, university, or any Senate committee. The points of view argued in the supplementary material should always be based on fact and evidence and are not necessarily the points of view of the executive council, university, or any Senate committee.

- iii. Report of the Treasurer and Finance Committee – Treasurer Timothy Rakitan

- Regular Allocations:
 - \$9,036.83 awarded in Regular Allocations; \$4,963.17 unused from Fall cycle
 - In total, 14 requests considered; more expected next semester
 - Send us your ideas for how to use the leftovers
- Special Allocations:
 - We spent \$1,500 to support the Lectures program; this depleted our Specials Allocations. Anyone interested can write legislation to move surplus funds into Specials.
- Socials surplus:
 - We've still got \$763.72 leftover from the Fall Social. Somebody tell me how to spend it!

Random Integer Set Generator

This form allows you to generate random sets of integers. The randomness comes from atmospheric noise, which for many purposes is better than the pseudo-random number algorithms typically used in computer programs.

Step 1: The Sets

Generate set(s) with unique random integer(s) in each.

Number of available PAGs goes here

Each integer should have a value between and (both inclusive; limits $\pm 1,000,000,000$).

The total number of integers must be no greater than 10,000.

Number of applications goes here

Step 2: Display Options

Each set will be printed on a separate line. You can choose from the following extra options:

- Number the sets sequentially
- Use commas to separate the set members
- Sort the members of each set in ascending order

You can select the order in which the sets are printed:

- Print the sets in the order they were generated
- Order the sets by the values that occur in them (in this case, you should also consider sorting the members of each set)
- Print the sets in random order

Step 3: Go!

Be patient! It may take a little while to generate your sets...
